EPARTMENT OF PATHOLOGICAL PHYSIOLOGY FACULTY OF MEDICINE, P. J. ŠAFARIK UNIVERSITY, KOŠICE

Topics and study materials for the 3rd credit test General Medicine 2021/2022

Cardiology, haematology, respirology

1. Cardiovascular system

- a) Physiology of the heart, cardiac cycle, pressures in the heart
- b) Congenital heart diseases, classification, causes, hemodynamic consequences, left to right shunt, right to left shunt; with cyanosis, without cyanosis.
- c) Valvular diseases, classification, etiology, hemodynamic changes; mitral; aortal.
- d) Heart failure, definition, classification, stages, compensatory mechanisms; pressure vs. volume overload, acute vs. chronic; left vs, right; backward vs. forward; diastolic vs. systolic dysfunction.
- e) Ischemic heart disease, atherosclerosis, mechanisms, risk factors; acute coronary syndrome, chronic forms of ischemic heart disease; myocardial infarction, classification, ECG diagnosis, biochemical markers.
- f) Dysrhythmias; conduction system of heart; description of action potential, ECG basic principles, causes and mechanisms of arrhythmias; classification; ECG diagnosis of dysrhythmias.
- g) Cardiomyopathy.
- h) Hypertension, mechanisms of blood pressure regulation, classification: essential vs. secondary hypertension; Hypotension

Study materials

- Unit 5 Circulatory Function; Ch 17 Control of Cardiovascular Function, p. 375 401; Ch 18 Disorders of Blood Flow and Blood Pressure, p. 402 – 443; Ch 19 Disorders of Cardiac Function, p. 444 – 485; Ch 20 Heart Failure and Circulatory Shock, p. 485 – 512 In: Porth, C.M. (Ed.) Essentials of pathophysiology, 4rd Edition, Wolters Kluwer/Lippincot Williams & Wilkins, 2011, ISBN-13: 978-1-4511-9080-9.
- Unit IX, Ch 31 Structure and Function of the Cardiovascular and Lymphatic Systems, p. 1083 1128; Ch 32
 Alterations of Cardiovascular Function, p. 1129 1193, Ch 33 Alterations of Cardiovascular Function in
 Children, p. 1194 1224;. In: McCance, K.L., Huether, S.E. (Ed.) Pathophysiology, 7thEdition, Mosby, Elsevier
 Inc., 2014, ISBN: 978-0-323-08854-1.
- Recommended: lectures, tutorials, data on dept. web; Other reading: pract. seminars, internet resources (Wikipedia, etc.).

2. Haematology

- a) Anaemia, classification, clinical signs, compensatory mechanisms, diagnosis, haematological values.
- b) Leukaemia, classification, etiology, clinical signs.
- c) Coagulopathy, thrombocytopenia, coagulopathies; vasculopathies, thrombophilia, thrombosis, disseminated intravascular coagulopathy.

Study materials

- Unit 3 Hematopoietic Function, Ch 11 Disorders of White Blood Cells and Lymphoid Tissues, p. 241 260; Ch 12 Disorders of Hemostasis, p. 261 276; Ch 13 Disorders of Red Blood Cells, p. 277 295. In: Porth, C.M. (Ed.) Essentials of pathophysiology, 4rd Edition, Wolters Kluwer/Lippincot Williams & Wilkins, 2011, ISBN-13: 978-1-4511-9080-9.
- Unit VIII, Ch 27 Structure and Function of the Hematologic System, p. 945 981; Ch 28 Alterations of Erythrocyte Function, p. 982 1007; Ch 29 Alterations of Leukocyte, Lymphoid and Hemostatic Function, p. 1008 1054. In: McCance, K.L., Huether, S.E. (Ed.) Pathophysiology, 7thEdition, Mosby, Elsevier Inc., 2014, ISBN: 978-0-323-08854-1.
- Recommended: lectures, tutorials, data on dept. web; Other reading: pract. seminars, internet resources (Wikipedia, etc.).

3. Respiratory system

- a) Regulation of breathing, pathological forms of breathing
- b) Respiratory failure
- c) Obstructive vs. restrictive diseases, classification, causes, clinical signs, ventilometry differences
- d) Ventilation disorders, hypo-, hyperventilation, sleep apnoea
- e) Pulmonary oedema, ARDS
- f) Pulmonary hypertension, cor pulmonale

Study materials

- Unit 6 Respiratory Function, Ch 21 Control of Respiratory Function, p. 513 538; Ch 23 Disorders of Ventilation and Gas Exchange, p. 565 – 598 In: Porth, C.M. (Ed.) Essentials of pathophysiology, 4rd Edition, Wolters Kluwer/Lippincot Williams & Wilkins, 2011, ISBN-13: 978-1-4511-9080-9.
- Unit X, Ch 34 Structure and Function of the Pulmonary System, p. 1225 1247; Ch 35 Alterations of Pulmonary Function, p. 1248 – 1289. In: McCance, K.L., Huether, S.E. (Ed.) Pathophysiology, 7thEdition, Mosby, Elsevier Inc., 2014, ISBN: 978-0-323-08854-1.
- Recommended: lectures, tutorials, data on dept. web; Other reading: pract. seminars, internet resources (Wikipedia, etc.).

Composition of the test

Multiple choice (30). Approximate composition:

- 1. Cardiovascular system
 - a) Congenital heart diseases
 - b) Valvular diseases
 - c) Heart failure
 - d) Ischemic heart disease, atherosclerosis, acute coronary syndrome, myocardial infarction
 - e) Dysrhythmias
 - f) Cardiomyopathy
 - g) Hypertension

2. Haematology

- a) Anaemia
- b) Leukaemia
- c) Coagulopathy

3. Respiratory system

- a) Regulation of breathing, pathological forms of breathing
- b) Respiratory failure
- c) Obstructive vs. restrictive diseases
- d) Ventilation disorders
- e) Pulmonary oedema, ARDS
- f) Pulmonary hypertension, cor pulmonale

Open questions. Approximate composition:

- a) Dysrhythmias
- b) Atherosclerosis, ischemic heart disease, angina pectoris, myocardial infarction
- c) Valvular disorders
- d) Congenital heart diseases
- e) Heart failure
- f) Hypotension and hypertension
- g) Anaemia
- h) Leukaemia
- i) Coagulopathy
- j) Obstructive & restrictive diseases
- k) Respiratory failure
- I) Heart and lung sounds and murmurs

In multiple choice test (via Rogo system) each question consists of 5 independent choices (a-e) to which students answer by Yes or No. Every one choice is awarded by 1 point. Altogether it is possible to achieve 150 points in multiple-choice part of test.

Rogo test rating

grade - %

A - 100 - 93

B - 92 - 85

C - 84 - 77

D - 76 - 69

E - 68 - 60

Fx - 59 and less

Each open question is credited by certain maxima of points, which can differ in various questions according to importance, content and difficulty.

Doc. MUDr. Roman Beňačka, CSc., mim. prof.
7 March 2022 Head of Department
